SECTION –II

ENGLISH LANGUAGE AND COMPREHENSION

Question 36-40

Read the passage below and answer the questions that follow :

Economists, ethicists and business experts persuade us that honesty is the best policy, but their evidence is weak. We hoped to find data that would support their theories and thus, perhaps, encourage higher standards of business behavior. To our surprise, their pet theories failed to stand up. Treachery, we found, can pay. There is no compelling economic reason to tell the truth or keep one's word. Punishment for the treacherous in the real world is neither swift nor sure.

Honesty is, in fact, primarily a moral choice. Business people do tell themselves that, in the long run, they will do well by doing good. But there is little factual or logical basis for this conviction. Without values, without a basic preference of right over wrong, trust based on such delusion would crumble in the face of temptation. Most of us choose virtue because we want to believe in ourselves and because others respect and believe us.

And due to this, we should be happy. We can be proud of a system in which people are honest because they want to be, not because they have to be. Materially, too, trust based on morality provides great advantages. It allows us to join in great and exciting enterprises that we could never undertake if we relied on economic incentives alone.

Economists tell us that trust is enforced in the market place through retaliation and reputation. If you violate a trust, your victim is apt to seek revenge and others are likely to stop doing business with you, at least under favourable conditions. A man or woman with a reputation for fair dealing will prosper. Therefore, profit maximisers are honest. This sounds plausible enough until you look for concrete examples. Cases that apparently demonstrate the awful consequences of trust turn out to be few and weak, while evidence that treachery can pay seems compelling.

36. What do economists and ethicists, according to the passage, want us to believe?

- a) Businessmen should always be honest
- b) Businessmen cannot always be honest
- c) Businessmen turn dishonest at times
- d) Businessmen are honest only at times

37. Which of the following, according to the author, is the reason for being honest in business?
